Colour: 140-5

**Terol** is a superior quality, decorative, economical Tyrolean render, designed for long life protection of exterior facades. Used by designers to create a natural, earthy appearance on a facade.

To satisfy a variety of architectural requirements, the finishes are available as Terol Smooth, Terol Coarse, Terol Granule 1mm & 2mm, Terol Decor 2mm & 3mm, Sahara 1mm & 2mm, and Terol Granite.

All types are manufactured in a range of standard colours or alternatively in a natural off-white colour which is overcoated with Terracoat Stain. This is an elastomeric pigmented, low profile coating imparting colour to the surface with minimal film build, thereby maintaining the original texture of the Terol.

These products are often used as part of the Terraco EIF System or as a long life decorative coating applied onto cement plaster walls, concrete columns and other exterior masonry surfaces.

Guaranteed to last, these products are backed by Terraco's International Quality Guarantee.
