**Terracoat BT** is a low profiled, protective and decorative architectural styled coating, incorporating the latest technology in acrylic, silicone and elastomeric resins. It is designed to outlast conventional paint systems and to protect the substrate under a variety of harsh conditions –searing desert heat, hot humid tropical climates and arctic winters.

This product is used extensively for both residential and commercial use. Being environmentally friendly and a low VOC product, it is suitable for both interior and exterior application. Applied using a block brush, a contemporary matt texture wall coating is created. It is ideally suited to both new build and redecoration projects as it masks surface imperfections.

This premium quality, ready-mixed textured coating is tough and durable, UV resistant, offers outstanding flexibility and enables the substrate to breathe. Formulated to last it is the specifiers preferred choice offering economical and long life benefits.

Guaranteed to last, these products are backed by Terraco's International Quality Guarantee.

Al Barari Villas, Dubai, U.A.E.

## TERRACOAT BT

### Contemporary textured wall coatings

- Natural matt appearance
- Seamless finish
- Environmentally friendly
- Low VOC
- Breathable
